- Develop and maintain a modern SaaS web application for real estate professionals, focused on solving operational and business challenges within the real estate industry.

- Develop and maintain a modern SaaS web application for real estate professionals, focused on solving operational and business challenges within the real estate industry.
- Build responsive and user-friendly interfaces using Next.js, React.js, TypeScript, JavaScript, and Tailwind CSS.
- Develop reusable and maintainable UI components using component-based frontend architecture.
- Integrate frontend applications with REST APIs to enable efficient communication between the user interface and backend services.
- Implement responsive, mobile-first interfaces that provide consistent experiences across desktop, tablet, and mobile devices.
- Troubleshoot frontend issues, identify technical problems, and implement reliable solutions and feature improvements.
- Apply frontend performance best practices to improve application speed, responsiveness, and overall user experience.
- Collaborate with other team members to translate product requirements and designs into functional web application features.
- Use Git and version control throughout the development process to manage code changes and collaborate effectively.
- Contribute to the continuous improvement, maintenance, and scalability of the SaaS platform.

Full Stack / Wordpress Developer – Castle Cluster Limited

2023 - 2026

- Developed and optimized WordPress and Elementor websites with SEO best practices to improve search visibility and online presence.
- Developed and maintained production-grade websites and web applications using React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, and WordPress.
- Built reusable UI components and component-driven architectures that improved code maintainability and scalability across multiple projects.
- Integrated and consumed REST APIs, handling data flow between frontend applications and backend services.
- Developed full-stack applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js), including authentication, CRUD operations, and database management.
- Designed responsive and mobile-first interfaces with emphasis on usability, accessibility, cross-browser compatibility, and performance.
- Implemented third-party integrations and payment services including Paystack, Stripe, and Shopify Payments.
- Performed debugging, troubleshooting, maintenance, and feature enhancements to improve application stability and user experience.
- Worked on projects across real estate, e-commerce, healthcare, and service-based industries. Collaborated with clients, designers, and other stakeholders to translate requirements into

functional and user-friendly digital experiences.

- Used Git and modern development workflows for source control, collaboration, and deployment processes

Intern – Mode 3 Tech

2022 - 2023

- Contributed to real-world projects using React, TypeScript, Node.js, Golang, PostgreSQL and MongoDB.
- Learned professional workflows with Git and agile collaboration.
- Collaborated with senior developers to build scalable features and debug production issues.
- Contributed to API development and integration, enhancing application functionality. Improved knowledge of Git version control, REST APIs, and deployment workflows.
- Gained practical experience with deployment workflows, debugging, and agile collaboration.

SKILLS

Frontend Development

- HTML5
- CSS3 (Flexbox, Grid)
- JavaScript (ES7+)
- React Js
- TypeScript
- Next Js
- React Native
- Expo
- TailwindCSS
- Bootstrap
- jQuery
- GSAP
- Vue Js

Backend Development

- Node Js
- Express Js
- TypeScript
- MongoDB
- Redis
- Restful APIs
- Auth(JWT, OAuth)
- Django
- Golang
- PostgreSQL

Other Technical Skills

- SEO Optimization
- Deployment & hosting (Vercel, Netlify, render, Cpanel etc)

CMS & Platform

- WordPress (Elementor)
- SHOPIFY
- Wix

Tools & Workflow

- Git & GitHub (Version Control)
- Postman
- Zustand (State Management)
- TanStack Query (React Query)
- Paystack & Stripe payment integration
- Responsive Design & Cross-Browser Testing
